Shopping Mall Development

We will unite with the community to create a commercial facility that will be loved.

We develop towns loved by people and create a lifestyle for residents living in Local Community.

In order to create such a mall, we must collaborate and cooperate with the local government and residents living in the area.

In the development process, we take time to build a strong relationship with our clients from the initial stages, listen to their requests with detailed explanations and share our mission and mall concept with them.

We have developed many malls that have been positioned as core projects for new industrial and urban development in cooperation with the local community.

Shopping Mall Development Process

Tenant Leasing

We will meet the diverse needs from customers with invitation to tenants that are highly attractive.

To enhance the value of a shopping mall, it is essential to respond to diversifying lifestyles and ever-changing needs, and have a variety of products, services, and information.

We are pursuing the creation of attractive and comfortable shopping malls where customers are entertained just by walking around and where they would want to make frequent return trips. Delivering the greatest satisfaction to each customer is our goal.

Shopping Mall Operation/Management

To be a shopping mall chosen by both customers and tenants

After the opening of a shopping mall, we continue the detailed management and operation every day to provide customers with a safe and comfortable environment. We also plan and promote various programs to attract customers and activities to promote sales with our know-how as a specialized commercial developer and conduct original market surveys to improve our ability to pull in more customers.

AEONMALL Vietnam provides tenants with multifaceted support such as training to improve customer service skills, collection and analysis of sales information, and advice for creating sales floors. We offer an employee-friendly work environment by setting up a convenience store and comfortable resting areas for employees.

Property Management

Revitalize and improve commercial facilities utilizing our vast experience and knowledge.

AEONMALL Vietnam plans to manage properties in which land and buildings are not owned by us.

We are engaged in the development of commercial facilities combining three pillars: town, commerce and people's lives as well as tenant management using our wide networks and experiences. We can also offer marketing strategies that meet the market trends, consulting services with proper guidance and appropriate advice; cost management, detailed reporting work and renovation to respond the needs of customers.

Our goal is to maximize the value of the commercial facility under given conditions, and we will deploy these services in the near future.
